

Pacific Group of Companies
HEALTH AND SAFETY POLICY

Management of the Pacific Group is committed to providing and maintaining a safe and healthy working environment for all its employees through the implementation of a comprehensive health and safety program that meets the requirements of WorkSafeBC's Occupational Health and Safety Regulation.

It is our policy to provide first quality service to clients while taking all necessary steps to prevent injury to our employees, employees of other companies on the job site, the customer and the public, and to prevent damage to all property within the influence of the job site.

To achieve this objective, we will comply with all applicable regulations. We cannot meet this attainable goal without full cooperation from all personnel; therefore, cooperation is required from all site and office personnel in the compliance with all rules and regulations governing safe operating procedures for the prevention of injury, disease and property damage.

Our health and safety program is designed in the best interests of all personnel, subcontractors, visitors and customers. We believe accident prevention and efficient production can go hand in hand and, accordingly, insist on a dedicated participation in the program requirements.
